

TUMALLAPALLI HASWANTH

Final-Year B.Tech – Computer Science Engineering
haswanth95@email.com — +91 8919822585

CAREER OBJECTIVE

Detail-oriented Computer Science undergraduate seeking entry-level roles in Software Development, Data Analysis, IT Support, or Quality Assurance. Skilled in Java, Python, SQL, debugging, and software testing with a strong foundation in problem-solving and analytical thinking.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering **2022 – Present**
Aditya College of Engineering and Technology, Surampalem

TECHNICAL SKILLS

- Programming: Java, Python, C
- Databases: SQL, MySQL, Database Management
- Web Technologies: HTML, CSS
- Testing: Manual Testing, Software Testing
- Tools & Concepts: SDLC, OOPS, Debugging, Data Validation

KEY SKILLS

- Application Support and IT Operations
- Manual Testing and Quality Assurance
- Requirement Analysis
- Analytical Thinking and Logical Reasoning
- Problem Solving

ACADEMIC PROJECTS

Placement Readiness & Eligibility Analyzer

- Developed a rule-based system to evaluate student placement eligibility.
- Analyzed academic data using SQL queries and eligibility criteria.
- Automated eligibility checks based on CGPA and backlog conditions.
- Validated and organized student data for recruitment processes.

Abandoned Object Detection System

- Developed a system to identify unattended or abandoned objects in a monitored area.
- Applied logical conditions to differentiate between moving and stationary objects.
- Improved monitoring accuracy by reducing false alerts.
- Focused on real-time detection concepts and security use cases.

CERTIFICATIONS

- Google IT Support Professional Certificate

STRENGTHS

- Strong problem-solving and debugging ability
- Quick learner with adaptability
- Team collaboration skills
- Self-motivated and responsible
